

### Step Sixteen

Slip the plastic strip sewn to the bottom of the Rear Curtain into the Tailgate Retainer. Center the Rear Curtain. Close the side zippers.

### Step Seventeen

Wrap the flap, sewn to the top above each door, around the Horizontal Rod and fasten the hook and loop strips to each other. The foam pillow with the flat surface must be on the outside of the horizontal rod for the soft doors to fit properly. (The flap will be on the inside of the horizontal rod for full, steel door use.)
