

## Step Six

Install the Vertical Retainer Mounts on top of the Side Belt Rails, just behind the door openings. Secure them in place with two 5/16-18 x 1" Phillips Head Bolts, two 5/16" Washers and two 5/16" Tapping Plates. Do not tighten the bolts yet.

## Step Seven

Lay the bow halves on top of the body with the holes in the Bow Mounts over the third and fourth holes in the Side Belt Rails. Secure the front hole in the Bow Mount with a 5/16-18 x 1" Phillips Head Bolt, a 5/16" Washer and a 5/16" Tapping Plate. Once the front hole is secure, raise the bow assembly up and secure the rear hole in the mount.

Once the Bow Mounts are secure, tighten all of the bolts on the Belt Rails.

**Note:** It may be helpful to have two people so that one person can support the bow halves while they are installed.
